## **Susan Swartz: Breaking Away, 2006-2018**

*June 30–September 2, 2018*

Over the past decade Susan Swartz has developed a painterly style that results in lush surfaces sculpted from the subtle accretion of color. This exhibit surveys recent work demonstrating a newfound synthesis and complexity in her approach to abstracting the natural landscape. Swartz's first exhibition in California, *Breaking Away, 2006–2018* follows a series of solo exhibitions in major European art museums.

## **Andrea Chung: You broke the ocean in half to be here**

*June 30–September 2, 2018*

Andrea Chung's practice finds unexpected intersections between materials, processes, and places. Chung creates installations that offer critical insight into legacies of colonialism and migration. This presentation—Chung's first traveling museum exhibition—highlights her inventive use of collage, printmaking, and photography in an installation that examines the predatory, non-native lionfish that has proliferated recently in the Caribbean Sea, destroying the local ecosystem. With their cyan-blue color, the prints conjure a fantastic underwater world, but they also present a potent allegory of colonization.
